

# Scleral Markers

## Scleral Markers (Sterile and Non Sterile)

The scleral marker is designed to be used as part of the intravitreal injection procedure for the treatment of AMD. It incorporates two calibrated markers to mark the injection point.

Code	Gauge and size	Description
 M7500	3.5mm/4.0mm	Scleral Marker. 80mm long
 M7510	3.5mm	Corneal Fixation / Incision Template. 75mm long
